Sunyard Releases S200 The First Third-Generation Android Mobile POS

Hangzhou, February 1, 2024 - Sunyard Technology, the leading global payment solution provider, is proud to release the S200, the first third-generation of Android mobile POS, to provide a more optimized payment solution for global market. The continual launch of new technology product comes from Sunyard's drive to push innovation forward.

Android POS terminals have always been one of the main pillars of Sunyard activities. The S200 is a kernel upgrade from Sunyard's previous payment terminals, from appearance to functionality.

What sets S200 apart?

- Powered by Sunyard OS based on Android 13, which can be in-depth customized to meet the requirements of PCI PTS 6.x.
- The 6.7-inch waterdrop display showcases the latest tech trends and interactive experiences, making it significantly different from a typical terminal to offer you a mobile phone experience.
- A 13MP rear camera paired with a 2MP front-facing one, and 1D/2D barcodes scanner support reading even if scratched, folded or stained, including backlight and lowlight adjustments.
- A large 7.2V/3350mAh battery capacity with low dissipation frees you from the concern of battery drain during the whole day.
- Advanced communication technologies, 4G/ 3G / 2G/ Dual-frequency Wi-Fi / Bluetooth 5.1, and omni-channel payment, easy to carry with you and can be used in versatile field.
- Customized configuration like charging dock, fingerprint module, etc., makes it easy and compact for expanding applications.
- Solid craftsmanship and durability improve the handgrip feel and service life greatly, in concert with the ergonomic design.
- Efficient, secure and easy to manage on SunTMS, based on Cloud storage architecture design, for local deployment and more value-added services.
